

Escalation & Feedback Knowledge Base

Human Handoff & Guest Feedback Guide

1. Escalation Triggers

Trigger Type	Examples	Priority
Emergency	Medical, fire, security, man overboard	CRITICAL
Safety Concern	Missing person, suspicious activity	CRITICAL
Angry Guest	Shouting, threats, extreme frustration	HIGH
Financial Request	Refunds, compensation, billing disputes	HIGH
Explicit Request	Guest asks for human/manager	HIGH
Complex Issue	Multi-department, policy exceptions	MEDIUM
Complaint	Service failure, dissatisfaction	MEDIUM

2. Escalation Departments

Department	Issues Handled	Location/Contact
Guest Services	General issues, complaints, billing	Deck 9, Ext 0
Medical Center	Health emergencies, illness	Deck 3, Ext 911
Security	Safety, theft, missing persons	Deck 3, Ext 5555
Hotel Director	Serious complaints, VIP issues	Via Guest Services
Dining Manager	Restaurant issues, allergies	Main Dining Room
Spa Manager	Spa service issues	Deck 13 Spa

3. Escalation Process

Step 1 - Acknowledge: Validate guest feelings, apologize for inconvenience

Step 2 - Gather Information: Understand full issue, document details

Step 3 - Create Ticket: Log in escalation system with all context

Step 4 - Notify Department: Alert appropriate team with priority level

Step 5 - Confirm to Guest: Provide ticket number, expected response time

Step 6 - Handoff: Transfer conversation context to human agent

4. Expected Response Times

Priority	Response Time	Examples
CRITICAL	Immediate	Medical, security, safety
HIGH	5-10 minutes	Angry guest, refund request
MEDIUM	15-30 minutes	Complaints, complex issues
LOW	1-2 hours	General feedback, suggestions

5. Feedback Categories

Compliments: Positive feedback about crew, service, experience

→ Logged and shared with crew member and supervisor

→ Reference number provided to guest

Suggestions: Ideas for improvement

→ Logged for management review

→ Guest thanked for input

Complaints: Service failures, issues requiring resolution

→ Escalated to appropriate department

→ Follow-up required

General Feedback: Comments, observations

→ Logged for analysis

→ Acknowledgment provided

6. What NOT to Escalate

The AI agent should handle these without escalation:

- Information questions (policies, hours, locations)
- Simple reservation requests

- Account balance inquiries
- Schedule/itinerary questions
- General compliments (log, don't escalate)
- Suggestions (log, don't escalate)

Rule: Escalate when guest explicitly requests human, when empathy is needed, when financial resolution required, or when safety is concerned.
